FOR IMMEDIATE RELEASE

VIKING MODULAR SOLUTIONS™ ANNOUNCES THE SATA CUBE³, A HIGH DENSITY SERIAL-ATA EMBEDDED SOLID STATE DRIVE DESIGNED FOR SPACE CONSTRAINED SYSTEMS

FOOTHILL RANCH, Calif. – March 10, 2009 – Viking Modular Solutions™, a division of Sanmina-SCI Corporation (Nasdaq NM: SANM), and designer and manufacturer of memory and flash modules, today announced SATA Cube³™, an embedded solid state drive (SSD) designed as an ultra small form factor, embedded industrial grade Serial ATA (SATA) SSD.

“The SATA Cube³ is an ideal solution for OEMs that require the benefits of non-volatile solid state storage and SATA performance in an ultra small form factor,” said Adrian Proctor, Vice President of Marketing for Viking Modular Solutions. “Additionally, this innovative product offers capacities ranging from 4GB to 256GB in the same X-Y footprint.”

The SATA Cube³ product is the optimum solution for Original Equipment Manufacturer (OEM) designers in the embedded, server, storage, networking and industrial sectors. Designers of form factors such as ATCA, uTCA, AMC, XMC, PMC and PCIe will find the low volumetric density and high storage capacity of the SATA Cube³ a strong solution for their space constrained application(s). The SATA Cube³ has been designed for the most demanding of environmental conditions where a ruggedized solution is highly beneficial.

This cost-effective option enables OEMs to design solutions with the high capacity and high reliability of a 2.5” or 1.8” SDD, but with the smallest mechanical footprint available today at 30x32mm. Available in densities of 4GB to 256GB, and with sustained read and write speeds of 110MB/sec and 79MB/sec respectively, the SATA Cube³ is 86 percent smaller than a 2.5” SSD/HDD. The SATA Cube³ is available as a BGA device or with a MicroSATA connector.

Viking Modular Solutions continues to advance its technology leadership role by proactively developing innovative products for the enterprise, server, storage, embedded and network infrastructure markets.

About Viking Modular Solutions

Headquartered in Foothill Ranch, California, Viking Modular Solutions is focused on delivering innovative, high-quality memory and flash products to the enterprise, server, storage telecommunications and embedded markets. Founded in 1989, Viking Modular Solutions has been providing Original Equipment Manufacturers (OEMs) with industry leading design, engineering, product support and customer service for 20 years. For more information, visit <http://www.vikingmodular.com>.

About Sanmina-SCI

Sanmina-SCI Corporation is a leading electronics contract manufacturer serving the fastest-growing segments of the global Electronics Manufacturing Services (EMS) market. Recognized as a technology leader, Sanmina-SCI provides end-to-end manufacturing solutions, delivering superior quality and support to OEMs primarily in the communications, defense and aerospace, industrial and medical instrumentation, multimedia, enterprise computing and storage, and automotive technology sectors. Sanmina-SCI has facilities strategically located in key regions throughout the world. More information regarding the company is available at <http://www.sanmina-sci.com>.

Sanmina-SCI Safe Harbor Statement

The foregoing, including the discussion regarding the expected benefits of SATA Cube³, contains certain forward-looking statements that involve risks and uncertainties, including uncertainties associated with anticipated rate of customer adoption of the SATA Cube³. The Company's actual results may differ significantly from those contemplated by such forward-looking statements as a result of the pricing and capabilities of competing solutions from other vendors, the performance of the SATA Cube³ in the customer's environment and other factors attendant to new product offerings, including factors set forth in our fiscal year 2008 Annual Report on Form 10-K and fiscal 2009 quarterly reports on Form 10-Q filed with the Securities Exchange Commission.
